Course milestone M13: Peer Review: Feedback and Questions for Every Other Poster

HONR 46400 · Evidence-Driven Research

What to submit

One file, `lastname_m13.pdf`. Everything this milestone asks for goes inside it, as sections in the order below.

Submit it on Brightspace, under **Assignments** then **M13**. Brightspace carries the deadline.

What to do

Your peer review

This is the milestone whose work is about someone else's research. I share a folder with every final poster as a PDF; the link comes with this assignment. You review every other poster and write, for each one, **constructive, tangible feedback** its author can act on, and **questions you will ask its author**. You ask those questions in person: in class, each author presents their poster to the room as a practice run before the Expo. Bring your review to that session.

What goes in your file

One section for every other poster, opening with its title and author:

1. **At least three feedback items.** Each points to a specific place on the poster, says what you noticed there, and offers a concrete change or next step. At least one names something that works well, so the author knows to keep it, and at least one concerns the evidence or the claim.
2. **At least three questions for the author**, each specific to that poster and answerable at the board, at least one probing the evidence or the boundary of the claim.

Close the file with your AI Research Ledger rows. This review is yours: never upload a classmate's poster to an AI tool. You may use AI only to tighten the wording of what you already wrote, with a ledger row.

How it is graded

Two separate scores. The **milestone score** records that the review is complete and on time: every other poster covered, the minimums met, the ledger present. The **Peer Review** score judges the quality of the feedback and the questions. Neither score evaluates your own poster.
