# Course milestone M11: Final Poster

### HONR 46400 · Evidence-Driven Research

## Start here

Your main file is `lastname_m11.pdf`; the artifact listed at the end of this section travels beside it. Build it in this order:

1. **Your carry-forward record, at the very top.** Open my review email and your research action plan side by side. Answer every numbered request for this milestone (each has an ID like `IR-M11-01`) and every step your plan sets for this milestone. Next to each one, write **Done** and exactly where I can find it, or **Not adopted**, with your reason and what you chose instead. Several items can point to the same piece of work.
2. **Then your milestone work and files**, exactly as *What to do*, below, lists them.

**How this counts.** Your answer to the action plan is worth 10 points of the rubric, scored for you individually. Each numbered request left unanswered costs 5 points, up to 20. Only requests and plan steps I sent you at least 48 hours before the deadline count; anything later moves to the next milestone. A step that is also a numbered request is counted once, as a request. If I sent you no numbered requests, or no plan steps apply, say so in one line. Not sure what applies to you? Write to me before the deadline; that is exactly what I am here for.

Submit it on Brightspace, under **Assignments** then **M11**. Brightspace carries the deadline.

Beside your PDF, hand in:

- `lastname_m11_poster.pdf`: Your final poster, exported from slide 1 of the course template as one full-size page. It is graded with the poster rubric and cannot live inside another PDF.

## What to do

### Your final poster

This milestone finishes your poster. You take the draft you submitted at M10, work through my feedback on it, and finish it on the course template, against the poster rubric. Your classmates review it at M12, and M13 locks the print file with only the repairs that review finds.

**What you work from**, and only these three things:

1. **My feedback on your M10 submission**, on Brightspace and in your mentoring email, with numbered requests. Start from it.
2. **The course poster template**, `honr464_poster_template.pptx`. Keep working in your M10 file, and follow its hidden guide page.
3. **The poster rubric**, `Evidence_Driven_Research_Poster_Rubric.pdf`, attached to this assignment. It grades this poster.

This milestone asks for no venue contract, transformation memo, content map, or new defense rehearsal: those belonged to M10. This week is the poster.

### What to hand in

1. **`lastname_m11_poster.pdf`**, your final poster: on the template, every section in final form (no bracket, prompt, or EXAMPLE item, and nothing you still plan to add), the preliminary draft tag removed, exported from slide 1 only as one full-size page. It is always its own file.
2. **`lastname_m11.pdf`**, your response record: the Instructor Request Record answering every numbered request from my M10 feedback, your action plan's commitments, your rubric self-check updated from M10 (one line per criterion: the sections that carry it, today's band, and what changed), and this milestone's AI Research Ledger rows.

## How to do it

1. **Revise from the feedback, on the board.** Every numbered request and every other comment either changes the poster or gets a reason in your record. A change that lives only in your record has not been made.
2. **Finish it on the template.** Keep the slide size, meet the minimum type sizes, and save every figure from the notebook cell that produced it, with alt text and the cell named in the caption. Check every number against your claim-to-evidence table, and give anything new its row there first. Keep "Preliminary results" in the footer.
3. **Check it against the rubric** and update your self-check. A criterion you would still put below Proficient is where your last hours go.
4. **Hand it in at the start of the class in which the peer review runs**, and bring a printed or screen-shareable copy: the review reads the board.

## How it is graded

The poster rubric grades your final poster, and that score is the poster part of your Poster Presentation grade. A separate process score records the file on time and on the template, the feedback worked on the board, the self-check, and the ledger.
