Evidence-Driven Research Presentation Planning Rubric (Course Milestone M12)

100 points. Each criterion is scored in one band; the band's points are a range, and the grader places the score inside it.

#	Criterion	Pts	Excellent	Proficient	Developing	Inadequate	Score
1	**Audience analysis**	15	**14–15 pts:** Names the audience you will actually meet, what they already believe, and what they will do with your answer; the key points are specific to that audience and visibly shape the pitches	**11–13 pts:** Clear audience, one key point generic	**6–10 pts:** Audience described in general terms only ("the public")	**0–5 pts:** No audience analysis	
2	**The three pitches**	25	**23–25 pts:** All three written, rehearsed, and within their ceilings with counts shown; each does its own job instead of being a cut-down version of the next; clear and concise enough to say without reading	**18–22 pts:** Within ceilings; one version doing the wrong job or hard to say aloud	**10–17 pts:** Over a ceiling, or one version missing	**0–9 pts:** Pitches not written or not counted	
3	**Bound discipline under compression**	25	**23–25 pts:** The boundary sentence is present and identical at all three lengths; no word is stronger in a short version than in a long one, or stronger than on the poster	**18–22 pts:** One soft word creeps in at thirty seconds	**10–17 pts:** A short version drops the bound	**0–9 pts:** A short version states a stronger claim than the evidence licenses	
4	**Poster integration**	10	**9–10 pts:** The block your hand points at is named for each length, and the transitions follow the poster's reading order	**7–8 pts:** Integration named for most lengths	**4–6 pts:** Integration vague ("I point at the poster")	**0–3 pts:** No poster integration	
5	**Question and discussion strategy**	15	**14–15 pts:** A concrete way to invite questions; predicted questions derived from your design and typed correctly; audience-directed questions that would really produce information; a prepared concession that is true, with a real smaller claim	**11–13 pts:** Complete; one question generic	**6–10 pts:** Questions plausible but not derived from your design, or fewer than three of a kind	**0–5 pts:** No prepared concession, or one that gives away more than the evidence	
6	**Craft, ledger & Round 02 confirmation**	10	**9–10 pts:** Plan readable and complete; ledger rows name real verification steps; the Round 02 confirmation reports what changed and what you carried forward	**7–8 pts:** Complete; one ledger row loose or the carry-over line thin	**4–6 pts:** Ledger thin, or the meeting confirmation incomplete	**0–3 pts:** Missing AI Research Ledger (scored 0, submission returned)	
	Total	**100**					

Revision and penalties

- Revision: eligible under the standing policy. A revised submission within 7 days of feedback recovers up to half the lost points.
- Late: −10 points per day, up to 3 days; not accepted after (documented emergencies handled individually per Purdue policy).
- Missing AI Research Ledger entry: the Craft, ledger & Round 02 confirmation row scores 0 and the submission is returned for completion before grading.
